

Abdullah, Blessing, Abdul, and Alexandre —

I'm sharing this document below

1. A **new document with updated and additional Trello tickets** that reflect what you should be working on going forward

FYI: The **previous backend roadmap and tickets** that I originally sent on **March 8, 2026**

Why I created the new document

Over the past few weeks, I consolidated:

- The original backend roadmap
- The onboarding architecture changes (RPA_ONLY, TEPA_ONLY, BOTH)
- The Trello ticket structure
- The overall system architecture

The goal was to eliminate any confusion and ensure that:

- The backend is aligned with the full KeyPath product (not just individual components)
- We are building a **complete, production-ready MVP**
- There are no gaps between ingestion, ledger logic, admin system, and integrations

This new document reflects a **more complete and execution-ready plan** to get us to MVP.

WHAT MUST BE COMPLETED BEFORE APRIL 6 (MANDATORY)

From your roadmap, the following should already be done (March 15 → April 4):

MUST EXIST (BLOCKERS IF NOT DONE)

- Properties schema (BE-101)
- Onboarding state engine (BE-102)
- Tenants (BE-201)
- Units + Tenancies (BE-103, BE-104)

- Participation engine (BE-202)
- Agreements + compliance (BE-105, BE-106)
- Activity log (BE-301)
- Document storage (BE-401)

👉 Source: “Backend Engineers New Trello Tickets and work to follow.pdf” that I sent around march 8 on Slack

● If ANY of these are incomplete:

Do not do the NEW WORK highlighted below.

BLOCKER — Foundation Not Complete

Description:

Core backend foundation incomplete from March roadmap. Must complete before April 6 work.

Checklist:

- Properties schema complete
- Units + Tenancies complete
- Participation engine complete
- Agreements + compliance complete

Acceptance Criteria:

- System can create:
 - property → unit → tenant → tenancy → participation
-

🧠 **TEAM + HOURS (LOCKED)**

Engineer	Role	Hours
----------	------	-------

Blessing	Core backend + integrations	5h
----------	-----------------------------	----

Abdul	Token + rewards + ownership	5h
-------	-----------------------------	----

Engineer	Role	Hours
----------	------	-------

Abdullah	Analytics + logs + reporting	5h
----------	------------------------------	----

Alexandre	Documents + OCR	2h
-----------	-----------------	----

 NEW EXECUTION PLAN (APRIL 6 → MAY 10)

Goal: **FULL MVP COMPLETE**

 WEEK 1 (APRIL 6 – APRIL 12)

FOCUS: CSV SYSTEM + TOKEN LEDGER (CRITICAL PATH)

 BLESSING

UPDATED TICKET: BE-101 — Properties Schema (UPGRADE)

Owner: Blessing

Estimate: 3h

Description (UPDATED):

Upgrade properties schema to support integrations + tokenization.

Scope:

- Add:
 - externalIds (yardi, appfolio, etc)
 - tokenConfig
 - integrationStatus

Acceptance Criteria:

- Property supports external PMS linkage
- Token config stored at property level

Checklist:

- Add externalIds object

- Add tokenConfig structure
- Add integration flags
- Backward compatible

NEW TICKET: BE-110 — CSV Ingestion Entry API

Owner: Blessing

Estimate: 6h

Description:

Backend entry point for CSV ingestion system.

Scope:

- Upload CSV
- Store raw file
- Trigger parsing job

Acceptance Criteria:

- File uploaded and stored
- Metadata saved (type, rows, size)

Checklist:

- POST /csv/upload
- Store file in storage
- Create ingestion record
- Trigger processing job

 **ABDUL**

UPDATED TICKET: BE-204 — Rewards Ledger (UPGRADE)

Owner: Abdul

Estimate: 5h

Description:

Convert rewards ledger into full event-based ledger.

Scope:

- Append-only ledger
- No overwrites

Acceptance Criteria:

- All rewards logged as immutable entries

Checklist:

- Add eventType
 - Add timestamp
 - Prevent updates
 - Add query by tenant
-

NEW TICKET: BE-210 — Unified Token Ledger (CRITICAL)

Owner: Abdul

Estimate: 4h

Description:

Create unified ledger for:

- rewards
- TEPA ownership

Scope:

- Separate types:
 - REWARD
 - OWNERSHIP

Acceptance Criteria:

- System can reconstruct balances from ledger

Checklist:

- Create ledger collection
- Add event types
- Add tenant + property linkage
- Add reconciliation logic

 **ABDULLAH**

UPDATED TICKET: BE-301 — Activity Log (UPGRADE)

Owner: Abdullah

Estimate: 3h

Description:

Extend logs to full audit system.

Scope:

- Log:
 - token changes
 - CSV imports
 - admin actions

Acceptance Criteria:

- Every major action logged

Checklist:

- Add entity types
- Add metadata support
- Add query filters

NEW TICKET: BE-308 — CSV Validation Engine

Owner: Abdullah

Estimate: 5h

Description:

Validate uploaded CSV before commit.

Scope:

- Detect:
 - missing fields
 - duplicates
 - invalid values

Acceptance Criteria:

- Returns:
 - valid rows
 - errors
 - warnings

Checklist:

- Validate schema
- Validate required fields
- Validate formats
- Return structured result

 **ALEXANDRE**

UPDATED TICKET: BE-403 — Document Verification (UPGRADE)

Owner: Alexandre

Estimate: 3h

Description:

Add risk classification system.

Scope:

- Add:

- GREEN / YELLOW / RED

Acceptance Criteria:

- Documents categorized by risk

Checklist:

- Add risk logic
 - Update verificationStatus
 - Connect to compliance engine
-

** WEEK 2 (APRIL 13 – APRIL 19)****FOCUS: CSV COMPLETION + IMPORT SYSTEM**

** BLESSING**

NEW TICKET: BE-111 — CSV Column Mapping Engine

Estimate: 5h

Description:

Map CSV columns → system fields.

Acceptance Criteria:

- Required fields must be mapped

Checklist:

- Auto-detect headers
 - Allow manual mapping
 - Validate required fields
-

** ABDUL**

UPDATED TICKET: BE-205 — Campaign Engine (UPGRADE)

Estimate: 4h

Description:

Trigger rewards automatically via events.

Checklist:

- Event-based triggers
 - Integration with ledger
-

 **ABDULLAH**

NEW TICKET: BE-309 — CSV Import Summary Engine

Estimate: 5h

Description:

Summarize import results.

Acceptance Criteria:

- Shows:
 - total rows
 - errors
 - valid
-

 **ALEXANDRE**

NEW TICKET: BE-404 — OCR Structured Extraction

Estimate: 3h

Description:

Extract structured fields from documents.

 WEEK 3 (APRIL 20 – APRIL 26)

FOCUS: ADMIN SYSTEM + CAP TABLE

 **BLESSING**

NEW TICKET: BE-112 — Property Registry API

 **ABDUL**

UPDATED TICKET: BE-206 — Ownership Ledger (UPGRADE)

 **ABDULLAH**

NEW TICKET: BE-310 — Cap Table Engine

 WEEK 4 (APRIL 27 – MAY 3)

FOCUS: STRIPE + EVENTS

 **ABDUL**

NEW TICKET: BE-211 — Stripe Integration

 **ABDULLAH**

NEW TICKET: BE-311 — Event Bus

 WEEK 5 (MAY 4 – MAY 10)

FOCUS: FINAL MVP COMPLETION

 **ALL ENGINEERS**

FINAL TICKET: MVP SYSTEM INTEGRATION TEST

Description:

End-to-end system test:

Checklist:

- CSV → data ingestion
- tenant → participation
- payment → token accrual
- admin → cap table
- dashboard → real data

Acceptance Criteria:

- Full lifecycle works without manual fixes

✅ FINAL OUTPUT

After this plan:

KeyPath will have:

- ✅ CSV ingestion (sales-critical)
- ✅ Token + rewards ledger
- ✅ Admin system of record
- ✅ Stripe integration
- ✅ Cap table + ownership tracking
- ✅ Audit + compliance
- ✅ PMS-ready architecture
